

IS THE VACCINE SAFE FOR OUR CHILDREN?

FACTS vs FABLES:

Your **FACT CHECKING GUIDE**
from **CITIZENSforFACTS.org**

In compiling EDITION TWO of this FACT CHECK booklet, we have used only mainstream media reports* and drawn information from other official sources like the CDC and the FDA.

Please FACT CHECK all sources by doing your own homework. Links are embedded in QR codes for your convenience as well.

**If you have trouble opening any of the links on a mobile device, please try a laptop or desktop.*

1. Which vaccine is safe for me?

FACT CHECK: THE SOUTH AFRICAN GOVERNMENT ANNOUNCED THAT CHILDREN/STUDENTS SHOULD NOW RECEIVE THE COVID-19 VACCINATION

HEREWITH A FREE GUIDE TO WHICH VACCINE IS SAFEST FOR YOU:

PLEASE NOTE: Very little data is available on Covid-19 vaccinations in younger people. This is because most countries started vaccinating older people first. Let's look at the official **VAERS** (Vaccine Adverse Effect Reporting System) data of the **CDC** (Centre for Disease Control) and the **FDA** (Federal Drug Administration). The **VAERS** reporting system reports some deaths and/or adverse effects following Covid-19 vaccinations in the USA.

USA DEATHS/ADVERSE EVENTS AFTER COVID-19 VACCINATIONS:

October 15, 2021 **Note: VAERS data is for the USA only***

17,128 DEATHS	83,178 HOSPITALIZATION	92,017 URGENT CARE	2,631 MISCARRIAGES	8,408 HEART ATTACKS	10,304 MYOCARDITIS/ PERICARDITIS	26,199 PERMANENTLY DISABLED
127,640 DOCTOR OFFICE VISITS	7,532 ANAPHYLAXIS	10,179 BELL'S Palsy	3,875 THROMBOCYTOPENIA/ LOW PLATELET	18,924 LIFE THREATENING	31,753 SEVERE ALLERGIC REACTION	9,734 SHINGLES

NOTE: The number of deaths/injuries reported to VAERS is likely to be grossly understated according to studies - <https://www.openvaers.com/images/r18hs017045-lazarus-final-report-20116.pdf>

VAERS (Covid Vaccine Adverse Event Reports)
October 15, 2021

Only 1% of deaths and/or adverse effects reported to VAERS?

EU DEATHS/ADVERSE EVENTS AFTER COVID-19 VACCINATIONS:

September 25, 2021 **Note: EudraVigilance data is for the European Union only***

As of September 25, **EudraVigilance** (the European database for reporting adverse reactions to vaccines), had collected 26,041 reports of deaths and 2,448,036 reports of injuries (half of them serious) from people who received one of the four Covid-19 injections currently licensed within the member countries of the European Union.

Once opened, follow the link, then click on the letter 'C' and scroll down to "COVID-19".

<https://www.adrreports.eu/en/index.html>

A. PFIZER-BIONTECH VACCINE:

In addition, the CDC states the following:

"As of October 6, 2021, VAERS has received **1 638 reports of Myocarditis** or Pericarditis** among recipients aged 30 and younger of the COVID-19 vaccine, mostly after the Pfizer-BioNTech or Moderna vaccines, and particularly in **male adolescents and young adults.**"

See the CDC report here (scroll down until you get to 'Myocarditis') <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/adverse-events.html>

Selected Adverse Events Reported after COVID-19 vaccination

B. JOHNSON & JOHNSON/JANSSEN VACCINE:

The CDC states the following: "...recent reports indicate a plausible causal relationship between the J&J/Janssen COVID-19 vaccine and TTS, a rare and serious adverse event — **blood clots with low platelets** — which has caused deaths."

RT NEWS: Fact checkers sponsored by vaccine makers!?

See the report here: <https://www.cdc.gov/vaccines/acip/meetings/downloads/slides-2021-05-12/07-COVID-Shimabukuro-508.pdf>

See risks of the JOHNSON & JOHNSON/JANSSEN Covid-19 vaccine on the FDA fact sheet: <https://www.fda.gov/media/146305/download>

FDA fact sheet for Recipients and Caregivers

CONCLUSION: Following reports of millions of vaccine injuries and tens of thousands of deaths immediately following Covid-19 injections reported to VAERS/EudraVigilance to date, it is **not quite correct to call any Covid-19 vaccine 'safe'.**

AREAS OF SERIOUS CONCERN: 'Fact Checkers' and research/reporting of vaccine trials, are funded by the vaccine makers themselves?!

See more information here: <https://citizensforfacts.com/information.mp4>

And here: <https://www.themoscowtimes.com/2021/08/20/leaked-sputnik-v-report-shows-more-inconsistencies-in-clinical-trial-data-a74847>

Thrombosis with thrombocytopenia syndrome (TSS) following COVID-19 vaccination

Leaked Sputnik V Report Shows More Inconsistencies in Clinical Trial Data

* This data set EXCLUDES all deaths/adverse reactions following Covid-19 vaccinations in the UK, the rest of Europe not belonging to the EU, South America, Canada, the USSR and other East Block countries, China, India, the Middle East, Africa, Australasia and the rest of the world.

** Myocarditis is a condition that often result in permanent heart damage and shorter life expectancy.

2. How safe is it to take the Covid-19 vaccine?

FACT CHECK: UNCERTAIN

It typically takes between FIVE to TEN years (often longer) to get a new vaccine approved (<https://coronavirus.jhu.edu/vaccines/timeline>). The FDA has granted 'emergency use' approval for Covid-19 vaccines during the pandemic with less than 12 months' worth of research data. Pfizer's own vaccine safety study will unfortunately only be completed in July of 2023 (<https://clinicaltrials.gov/ct2/show/NCT04848584>).

Logically speaking, no government, doctor, scientist, virologist or immunologist can therefore know for certain what the long-term effects of the Covid-19 vaccine will be in your body.

Whilst some are still adamant that the 'advantages of taking the Covid-19 vaccines outweigh the risks', the latest reports from reputable media titles and research from abroad are of serious concern:

a) The TELEGRAPH in the UK reported on 9 September 2021 that "Young males are six times more likely to suffer from heart problems after being jabbed than being hospitalised from coronavirus..."

See the full article here:

<https://www.telegraph.co.uk/news/2021/09/09/teenage-boys-risk-vaccines-covid/>

Teenage boys more at risk from vaccines than COVID-19

b) The TORONTO SUN reported on 3 September 2021 that more than 100 Ontario youths were admitted to hospital with vaccine-related heart problems, or Myocarditis or Pericarditis.

See the full article here:

<https://torontosun.com/news/provincial/over-100-ontario-youth-have-been-sent-to-hospital-for-vaccine-related-heart-problems>

More than 100 Ontario youths sent to hospital for vaccine-related heart problems

and here:

https://www.publichealthontario.ca/-/media/documents/ncov/epi/covid-19-myocarditis-pericarditis-vaccines-epi.pdf?sc_lang=en

Myocarditis and Pericarditis following vaccination with COVID-19 mRNA vaccines in Ontario

c) The SEATTLE TIMES and other media in the USA reported that following Covid-19 vaccination, the menstrual cycles of thousands of young girls and women have been affected, causing heavy bleeding. This may also mean that their fertility is impacted.

Women said the COVID-19 vaccine affected their periods

See the full article here: <https://www.seattletimes.com/nation-world/women-said-the-covid-vaccine-affected-their-periods-now-more-than-1-6-million-will-go-into-researching-it/>

d) Should TEENS BE VACCINATED AGAINST COVID-19?

For those under 17, the latest studies suggest a much higher risk of injury from taking the Covid-19 vaccine than of dying from Covid-19.

Do your own research here:

<https://clinicalnews.org/2021/09/08/sars-cov-2-mrna-vaccination-associated-myocarditis-in-children-ages-12-17-a-stratified-national-database-analysis/>

SARS-CoV-2 mRNA vaccination-associated Myocarditis in Children ages 12-17: A Stratified National Database Analysis

The CDC states the following in the link below: "The highest reporting rates (of Myocarditis) were among males aged 12-17 years and those aged 18-24 years (62.8 and 50.5 reported Myocarditis cases per million second doses of mRNA Covid-19 Vaccine administered, respectively)."

Do your own research here:

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7027e2.htm>

Use of mRNA COVID-19 vaccine After Reports of Myocarditis Among Vaccine Recipients

INTERESTING CALCULATION: Your *chance of dying* from Covid-19 as a teenager is **ONE in 134 501** or **7.43 IN A MILLION** or **0.0007%** over the course of 22 months since Covid-19 started (see Point 5 below).

This means you are at approximately **10 X bigger risk of permanent heart damage when taking the vaccine** than dying of Covid-19 (using the Myocarditis statistics that the CDC themselves provide - see above CDC link)*.

CONCLUSION: The vaccine roll-out to teenagers started only about two months ago (whilst you have already survived Covid-19 for the past 22 months). Your risk of injury or death from the Covid-19 vaccines on any given day may therefore actually be much higher.

NOTE: According to studies, the number of deaths/injuries reported to VAERS is likely to be grossly understated.

Do your own research here:

<https://www.openvaers.com/images/r18hs017045-lazarus-final-report-20116.pdf>

*NOTE: The CDC however still maintains that the 'risk of Covid-19 outweighs the negatives of the Covid-19 vaccines'.

3. Do I have to sign an indemnity when taking the vaccine?

FACT CHECK: NO, BUT...

Did you know that the government and the vaccine manufacturers (who makes Billions of dollars from the Covid-19 vaccines), have been granted 100% immunity and non-liability for ANY death and/or injury and/or disability you may suffer due to the Covid-19 vaccines - even if they are shown to be negligent? This means **you cannot sue the vaccine-makers** or hold them responsible should you suffer any adverse effects and/or die after having taken the Covid-19 vaccine.

See the proof here:

<https://www.cnbc.com/2020/12/16/covid-vaccine-side-effects-compensation-lawsuit.html>

<https://www.wsj.com/articles/people-harmed-by-coronavirus-vaccines-will-have-little-recourse-11602432000>

CNBC: "It is very rare for a blanket immunity law to be passed..."

Wall Street Journal: "People harmed by Coronavirus Vaccines will have little recourse..."

4. Who then can I sue?

If I die or get an adverse reaction after vaccination, can I or my loved ones sue anybody who coerced me to take the Covid-19 vaccine?

FACT CHECK: YES

Although the vaccine makers have negotiated indemnity against all claims, **any employer, government official or even the Headmaster of a school can be held personally liable** should you suffer any adverse effects and/or die from being coerced or forced to take the Covid-19 vaccine (this includes claims against the person who physically administered the vaccine). There are a number of such **legal cases already being filed** worldwide and it is expected that thousands more will follow, resulting in personal-liability **vaccine-injury claims worth Billions of Rands.**

5. What are my chances of dying from Covid-19?

FACT CHECK: VERY, VERY, VERY SMALL

According to the latest CDC statistics*, **542 teenagers between the ages of 0 – 17 years have died of Covid-19 in the USA** over the **past 22 months** since the pandemic started. The US population under 17 years of age totals **72.9 million**. A teenager's chance of dying from Covid-19 is thus only **ONE in 134 501** (72.9 million divided by 542) since Covid-19 started (or 0.0007%). Your chance of dying of Covid-19 on any given day, is thus approximately **ONE in 89 million** (one in 134 501 multiplied by approx. 660 days since the pandemic started) - about the same odds as being struck by lightning!

DID YOU KNOW?

You are about 100 times more likely to die from ANY other cause (being run over by a car, drowning, overdosing on drugs, etc.) than dying from Covid-19. According to the CDC, approx. 57 000 teenagers die each year from various other causes in the USA.

COVID-19 Death Data and Resources. Sex and age.

Number of children (in millions) projected 2020-2050

See the statistics here:

<https://www.childstats.gov/AMERICASCHILDREN/tables/pop1.asp>

* (ending 16 October 2021)

6. Can I trust the reputation of the vaccine makers?

FACT CHECK: UNCERTAIN

A) VACCINE-MAKER PFIZER:

Vaccine makers like Pfizer **do not have a good track record**. They have a history of putting their own profits before the health of people. They typically have to pay Billions of dollars every year to settle law suits because of pharmaceutical products that they sell or release that are harmful to humans.

Pfizer to Pay
\$2.3 Billion for
Fraudulent Marketing

Do your own research by following this official link from the US Department of Justice here: <https://www.justice.gov/opa/pr/justice-department-announces-largest-health-care-fraud-settlement-its-history>

Herewith a quote from the above law suit in the USA:

“The size and seriousness of this resolution, including the huge criminal fine of \$1.3 Billion, reflect the seriousness and scope of Pfizer's crimes,” said Mike Loucks, acting U.S. Attorney for the District of Massachusetts. *“Pfizer violated the law over an extensive time period.”*

“Illegal conduct and fraud by pharmaceutical companies puts the public health at risk, corrupts medical decisions by health care providers, and costs the government Billions of dollars,” said Tony West, Assistant Attorney General for the Civil Division.

In addition, Pfizer has previously also been found guilty of paying off doctors and researchers in the USA to speak on their behalf. The company admitted to paying 4 500 doctors more than USD 20 Million over a period of only 6 months in 2009. They also paid an additional USD 15.3 Million over a short period to 'researchers' to run 'positive clinical trials' on their products.

Pfizer received the biggest drug-related fine in US history in 2009 as part of a USD 2.3 Billion plea deal for mis-promoting medicines Bextra and Celebrex and paying 'kickbacks' to 'compliant' doctors. Pfizer pleaded guilty to the felony of marketing four drugs including Bextra *“with the intent to defraud or mislead.”* They were forced to withdraw their arthritis painkiller Bextra in the USA and EU for causing heart attacks, strokes, and serious skin disease. *“Clearly in a move to boost revenue, Pfizer illegally paid doctors kickbacks for 'off-label' use of more than one of its drugs, which resulted in patients being injured or killed. Among them were Bextra (valdecoxib); Geodon (ziprasidone HCl), an atypical antipsychotic; Zyxov (linezolid), an antibiotic; Lyrica (pregabalin), a seizure*

medication; its famous Viagra (sildenafil), an erectile dysfunction drug; and Lipitor (atorvastatin), a cholesterol drug.

Do your own research on Pfizer's fraud here: <https://www.nytimes.com/2010/04/01/business/01payments.html>
<https://www.news-medical.net/news/20100401/Pfizer-admits-paying-2435-million-to-doctors-over-last-6-months.aspx>
<https://gizadeathstar.com/2021/08/trust-the-big-pharma-science/>

New York Times:
Pfizer bribes 4500
Medical Doctors...

Pfizer admits to
bribing doctors and
research centres

Trust the
(Big Pharma)
science?

B) VACCINE-MAKER JOHNSON & JOHNSON:

Johnson & Johnson does not fare much better. In 2021 they lost a case brought against the company for asbestos dust being an ingredient in its talc powder products, including Johnson & Johnson baby powder, causing women to develop ovarian cancer. The company had to pay a USD 2 Billion fine (reduced from USD 4 Billion) and said that it is still facing more than an additional **21 800 lawsuits** against it over its talc products.

Court papers stated that Johnson & Johnson “knew for decades that their talc powders contained asbestos, a highly carcinogenic substance with no known safe exposure level.”

Johnson & Johnson stopped selling their baby powder in America in June of 2020. Surprisingly however, the company is apparently STILL selling the same asbestos-laden baby powder in South Africa.

Follow the link of CNBC channel below to get the story yourself.

<https://www.cnbc.com/2021/06/01/supreme-court-rejects-johnson-johnsons-appeal-of-2-billion-baby-powder-penalty.html>

Supreme Court rejects
Johnson & Johnson's appeal
of USD 2 Billion penalty in
baby powder cancer case

CAN YOU TRUST THEM WITH A COVID-19 VACCINE?

There is an old saying: “A leopard cannot change its spots”.

But it is perhaps wrong to judge them on their past crimes and mistakes. *Let's hope they have indeed 'changed their spots' with Covid-19 vaccines. Let's HOPE we will NOT find out later that they have again paid off doctors, researchers, the media and government officials and killed and/or injured millions more with Covid-19 vaccines...*

7. What are my chances of dying from the Covid-19 vaccine?

And as a teenager, what are my chances of suffering a serious 'adverse effect' from the Covid-19 vaccine?

FACT CHECK: ACCORDING TO THE LATEST RESEARCH, YOU MAY BE MORE LIKELY TO SUFFER A SERIOUS ADVERSE EFFECT FROM THE COVID-19 VACCINE THAN FROM THE DISEASE ITSELF

The TELEGRAPH in the UK reported on 9 September 2021 that *"Young males are six times more likely to suffer from heart problems after being jabbed than of being hospitalised from coronavirus..."*

See the full article here:

<https://www.telegraph.co.uk/news/2021/09/09/teenage-boys-risk-vaccines-covid/>

Teenage boys more at risk from vaccines than Covid

8. Is natural immunity stronger than vaccine-induced immunity?

FACT CHECK: YES

According to the reputable AMERICAN INSTITUTE FOR ECONOMIC RESEARCH (AIER), a growing body of research is making it increasingly clear that natural immunity to Covid-19 owing to previous infection is stronger, more durable, and broader than vaccine-induced immunity. This fact has significant implications for governmental, school, employer and business plans to restrict people who aren't vaccinated.

Stanford Medical School physician and economist Jay Bhat-tacharya, Harvard Medical School biostatistician and epidemiologist Martin Kulldorff, and University of Oxford theoretical epidemiologist Sunetra Gupta, are only a few of the scientists supporting these facts.

<https://www.aier.org/article/stronger-more-robust-natural-immunity-thwarts-any-case-for-vaccine-passports/>

9. Do I have a better chance of surviving Covid-19 when 'fully-vaccinated'?

FACT CHECK: UNCERTAIN - CONTRADICTING REPORTS BETWEEN THE WHO, CDC AND ACTUAL DATA?

PUBLIC HEALTH ENGLAND releases their statistics on Covid-19 deaths regularly (*feel free to download their previous reports yourself*). The latest 'PUBLIC HEALTH ENGLAND Technical Briefing 23' indicates on pages 19 and 20 that 'fully vaccinated' people are now dying from the 'Delta variant' in far bigger numbers than 'unvaccinated' individuals. Out of the 257 357 'unvaccinated' individuals who contracted the DELTA variant, 722 people died (ONE in 356 chance of dying when 'unvaccinated'). Out of 157 400 'fully vaccinated' people, 1 613 died (ONE in 98 chance of dying when 'fully vaccinated'). 356 divided by 98 = 3.63 bigger chance for the 'fully vaccinated' of dying from the DELTA variant.

(NOTE: The Public Health England Technical Briefing only recognizes deaths from the Covid-19 vaccine if it occurred MORE than 14 days AFTER dose 2 of the Covid-19 vaccine and bundles deaths within two weeks of dose 2 as 'unvaccinated' deaths. The actual number of people having died after two doses of the vaccine may therefore be considerably higher.)

Get the full report here (or simply GOOGLE "PUBLIC HEALTH ENGLAND TECHNICAL BRIEFINGS" and download the various reports for yourself to study).

Do your own calculations to verify:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1018547/Technical_Briefing_23_21_09_16.pdf

SARS-CoV-2 variants of concern and variants under investigation in England | Technical briefing 23 (see pages 19 and 20 for the statistics referred to above)

10. If I choose to vaccinate, how many vaccines would I have to take?

FACT CHECK: NOBODY KNOWS

At present this topic seems to be a bit of a slippery slope. **ISRAEL** (the country which has the highest percentage of vaccinated people in the world), is now experiencing a huge number of 'breakthrough cases' of 'fully-vaccinated' people who are getting sick from Covid-19 and dying. According to them, the effectiveness of the vaccines reduce dramatically after about three to four months. 59% of people currently in intensive care in Israel are 'fully-vaccinated', with the numbers of 'vaccinated' deaths climbing daily.

A grim warning from Israel: Vaccination blunts, but does not defeat Delta

Virus czar calls to begin readying for eventual 4th vaccine dose

See the facts here as reported by SCIENCE magazine:

<https://www.science.org/news/2021/08/grim-warning-israel-vaccination-blunts-does-not-defeat-delta>

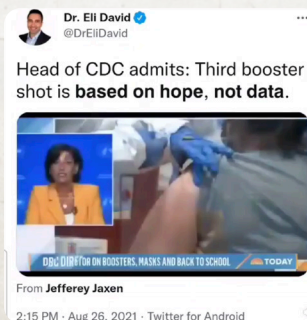

Israel is now administering the third "Booster" shot (the third injection within LESS THAN 12 MONTHS) to try to 'boost' the weakening immune systems of "vaccinated" people. A fourth "shot" is already under discussion.

See the facts here:

<https://www.timesofisrael.com/virus-czar-calls-to-begin-readying-for-eventual-4th-vaccine-dose/>

CONCERN: The CDC director has stated publicly that the decision to use a 'booster injection' is 'not based on science, but on hope'.

Watch the CDC interview:

CONCLUSION? It obviously makes logical sense to base one's answer on the experience of countries where a large percentage of people have already been 'fully vaccinated' earlier on. Based on their experience, if you decide to take the Covid-19 injection, you may have to get three to four additional 'booster' injections each year - *probably for the rest of your life?*

What the long-term effects of multiple mRNA Covid-19 injections will be on your general health and natural immune system, nobody will be able to tell for years to come.

DID YOU KNOW?

Deaths immediately following Covid-19 vaccinations, are over 30 times higher than the sum-total of all other vaccine-related deaths recorded since 1990!

https://riotimesonline.com/brazil-news/modern-day-censorship/covid-vaccine-deaths-and-injuries-not-talked-about-enough/?_cf_chl_jschl_tk__=pmd_PUI65beo-bjJV0YC75x4d9TI5U18fduU_jF8.IERzeKo-I635863924-0-gqNtZG-zNAnujcnBszQel

RIO TIMES: Deaths and serious injuries occurring after Covid-19 vaccinations are increasing significantly...

DID YOU KNOW?

The 1976 Swine Flu vaccine was stopped after only 53 people died from taking that vaccine.

Well over 50 000 people already died immediately following Covid-19 vaccinations...

<https://youtu.be/4bOHYZhLOWQ>

<https://edition.Cnn.Com/2009/health/04/30/swine.Flu.1976/Index.Html>

Ex-CDC head recalls '76 swine flu outbreak

11

11. If I am vaccinated, can I still get Covid-19?

FACT CHECK: YES

Government sources state that you are less likely to get sick, but recent statistics from ISRAEL (the world's most vaccinated nation), suggest otherwise. The majority of new DELTA VARIANT COVID-19 cases are now among 'fully-vaccinated' people.

Uri Shalit, a bioinformatician at the Israel Institute of Technology, told Science that *"most of the hospitalized patients are actually vaccinated."*

Israel's Grim COVID-19 Data suggests vaccines alone won't stop pandemic

Get the information here: <https://www.newsweek.com/israel-covid-case-break-through-data-shows-vaccines-not-pandemic-silver-bullet-1622465>

PubMed - Vaccinated has higher viral loads...

<https://pubmed.ncbi.nlm.nih.gov/34351882/>

PubMed -Delta outbreaks among fully-vaccinated...

<https://pubmed.ncbi.nlm.nih.gov/34596015/>

CDC admits vaccinated are spreading the virus

12. If I am vaccinated, can I still make other people sick?

FACT CHECK: YES

The CDC admitted in a television interview that **after vaccination**, you may now be an **'asymptomatic' carrier of the virus**.

After vaccination, you may actually be at greater risk of giving the virus to older loved ones within your family and circle of friends, as you may carry and spread Covid-19 without feeling sick yourself. The highly respected PubMed publication also reports that the vaccinated may actually carry higher viral loads (see links on left).

13. If I am vaccinated, do I still have to wear a mask?

FACT CHECK: YES

Initially the CDC stated that 'fully-vaccinated' people could stop wearing masks, but after research indicated that one can still both get and spread the virus, they changed their opinion again.

14. Why then take the Covid-19 vaccine?

FACT CHECK: UNCERTAIN

Given the conflicting data and censorship of information about the long-term side-effects or vaccine injuries and deaths from Covid-19 vaccinations, perhaps start reading again from Point One above should you still have trouble making up your mind... A LAST THOUGHT: Would you choose an experimental mRNA vaccine developed over a very short period of time, over your natural immune system that developed over thousands of years? The choice is yours... ■
